# Intermediate-Term Fixed Income Pool

As of 6/30/2020

## Trailing Returns

Int-Term Fixed Income Pool & Blended Benchmark	Year to Date	Quarter	1 Year	3 Years Annualized	5 Years Annualized	10 Years Annualized
<b>Intermediate-Term Fixed Income Pool TR</b>	<b>6.07</b>	<b>3.80</b>	<b>8.54</b>	<b>5.38</b>	<b>4.41</b>	
Intermediate-Term Fixed Income Benchmark	5.98	4.01	8.49	5.44	4.51	4.43

## Purpose

The purpose of the Intermediate-Term Fixed Income Pool is to provide capital preservation and current income to help meet spending requirements of donor portfolios. The Pool will utilize a passive, cost effective approach with a secondary objective to provide broad exposure to U.S. income markets. The Pool is diversified across U.S. Treasuries notes and bonds, corporate bonds, bank loans, mortgaged-backed securities and U.S. Treasury Inflation-Protected Securities. The average effective duration and interest rate risk of the Pool will be commensurate with broad fixed income benchmarks such as the Barclays U.S. Aggregate Bond Index.

## Inception Date: January 1, 2014

Performance is presented gross of administrative fees but net of all investment management fees, brokerage, consulting and other transactions costs.

Estimated Pool Investment Management Fee: 0.09%

## Purpose

The purpose of the Short-Term Fixed Income Pool is to provide capital preservation and current income to help meet spending requirements of donor portfolios. The Pool will utilize a passive, cost effective approach with a secondary objective to provide broad exposure to U.S. income markets. The Pool is diversified across U.S. Treasury notes and bonds, corporate bonds, bank loans, mortgaged-backed securities and U.S. Treasury Inflation-Protected Securities. The Pool will have a lower average effective duration than broad fixed income market benchmarks such as the Barclays U.S. Aggregate Bond Index, hence limiting overall interest rate risk.

# Money Market Pool

As of 06/30/2020

---

## Purpose

The purpose of the Money Market Pool is to provide liquidity for participating charitable funds and organizations in funding grant making and payment of fees and administrative costs while providing desired principal stability. The long term investment objective of the Money Market Pool is to seek a competitive market return to preserve and grow the portfolio, provide cash flows to meet charitable needs now and those in the future. As such, the Money Market Pool is highly liquid, which enables donors to access funds for grants in a timely manner. The Money Market Pool invests in bank deposits and obligations of the United States government and its agencies.

## Investment Commentary—June 30, 2020

After experiencing one of the fastest declines in the stock market, (down 34.8% from the peak in just over a month) the U.S. market has achieved one of the fastest recoveries on record (up 41.5% from the low in March to June 30th). These returns are based on the total return of the Wilshire 5000 Total Market Full Cap Index. The percentage changes make it appear as though the market is at an all time high. But, it is not. The decline is calculated off of the peak level of 160.95 while the rebound is calculated off the low of 104.46.

Commentators suggest that there are two possibilities at work in the recovery. Some ascribe the rebound to the forward looking nature of the stock market. In that view the market would be sounding the “all clear” based on the rapid response of the Federal Reserve Open Market Committee and the federal government’s rapid response to the crisis. Cash flowed into the hands of individuals and small businesses with amazing speed to mitigate the negative impact of the lockdowns imposed by the executive branches of state and local governments. Commentators working from this data would suggest that we will successfully overcome the damage done by the lockdowns.

The second group of commentators would take what is known as the technical view by tracing the money distributed by the U.S. Treasury and the Federal Reserve from the hands of businesses and individuals into the stock market. This factor would be particularly true of the purchases made by the Federal Reserve which totaled over \$3 trillion as total assets at the Fed grew from \$4.2 trillion in January to a peak of \$7.2 trillion in early July. The Federal Reserve purchased U.S. Treasury bonds as well as exchange traded funds investing in corporate bonds. A significant portion of the proceeds from those purchases probably found their way into the stock market given the extremely low yields offered by bonds.

Analysts can also take a technical approach to the money distributed by the federal government to individuals and businesses. As one might suspect, that money has found its way into the banking system and has shown up in the money supply numbers. Annual growth in the money supply (M2) for the second quarter was 22.9% versus the prior year (see chart). Until this year the fastest annual growth in M2 had been 13.3% in the 1970’s. Typically, accelerating growth in the money supply precedes accelerating growth in the economy.

But, there can be too much of a good thing. At some point in time, the growth in the money supply may stimulate inflation well above the Federal Reserve’s target of 2%. It is ironic to be speaking of inflation when there is so much slack in the economy today. However, in a time when supply chains have been disrupted and product availability is limited, the cash is there to fuel price increases. Accelerating inflation is not imminent, but it is a possibility to consider in making long-term plans.

The Domestic Equity Pool returned 22.1% for the quarter bringing the year-to-date return to -3.4%. The International Equity Pool had a return of 17.9% in the quarter bringing the year-to-date return to -10.5%.

The Intermediate-Term Fixed Income Pool gained 3.8% in the quarter and 6.1% for the year-to-date as the average yield-to-maturity has fallen to 1.43% compared to 2.39% on December 31st. The Short-Term Fixed Income Pool gained 1.7% in the quarter and 3.4% year-to-date as the average yield-to-maturity fell to 0.83% compared to 2.10% on December 31st.

With the Federal Reserve’s guidance that overnight interest rates will remain at or near zero for the next year or two, we would expect the Money Market Pool to have a yield of zero during that time.
